

MONTHLY PARKER UPDATES

Lincoln Center Monthly Customers: Technology Upgrades & Procedures

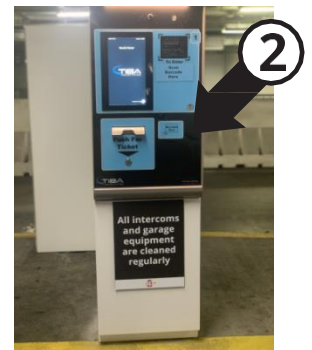

SECTION A – LICENSE PLATE RECOGNITION

1. As each vehicle enters the garage, a license plate recognition camera will scan each vehicle's license plate, granting access to authorized monthly permit parkers automatically, without needing to use your access card.
2. Monthly parkers may add multiple license plates per account, but only one vehicle per account will be allowed inside of the garage at a time. This will ensure a quick and seamless ingress/egress to and from the facility.

SECTION B – SECONDARY METHOD OF ACCESSING THE GARAGE

1. If your vehicle does not have a front license plate, you will need to use your monthly access card. Please scan your monthly access card parallel to the sign "key card here" as shown in figure 2.
2. If the LPR is not working, your keycard is your backup access to get in and out of the garage. Please scan your monthly access card as shown in figure 2.
3. If the LPR is not working and you forgot your monthly access card, please take a transient ticket, as shown in figure 3. Please then get your ticket validated at the manager's office before exiting.

*The new parking equipment now supports touchless or contactless payments at all automated payment devices. This includes credit cards, debit cards, key fobs, smart cards, or other devices, including smartphones and other mobile devices, that use radio-frequency identification (RFID) or near field communication (NFC, Apple Pay, Google Pay), or any bank mobile application that supports contactless) for making secure payments.
